ADSL2+ explained

As part of our commitment to providing better broadband and phone services Australia-wide, we've built our own world class ADSL2+ network - the iinet network - which allows us to offer the fastest speeds your line can handle (up to 24,000 kbps).

connection

Our broadband plans have a one-off connection fee of \$79.95. An early termination fee applies to connections cancelled or relocated within the first six months.

hardware

Broadband requires different hardware to dialup. So if you are new to the internet or use dialup, you may require an ADSL modem. If you bundle with VoIP (or iiTalkpack), you will need a VoIP compatible modem and an additional phone handset.

fair contract guarantee

When you sign up for the optional 24 month contract, you commit to retain your broadband service for this set period. However, our fair contract guarantee allows you to change between plans at any time without constituting a break of contract. Full details available online.

If you end your contract early, you will only be required to pay the difference between the full price and discounted price of any hardware purchased, or any waived setup fees.
