free local and national calls with iiTalkpack

Local and national calls made on your iiTalkpack service are free. A fair use policy applies in the case of excessive calls. For more information, visit: http://www.iinet.net.au/about/cra/fair_use_policy.html

flat-rate monthly fees with no extra charges

If your download quota is reached, your speed is shaped to 64kbps for the rest of your billing month. Our broadband plans also give you access to the iiNet freezone, where you can get music, movies, games and more without using up your quota.

looking for more quota?

Our business plans are available to home and business users, and feature higher quota limits. Request a broadband1 business brochure now or check out www.iinet.net.au/business for more info.

connection

Our broadband plans have a one-off connection fee of \$79.95. An early termination fee applies to connections cancelled or relocated within the first six months.

hardware

Broadband requires different hardware to dialup. So if you are new to the internet or use dialup, you may require an ADSL modem. If you bundle with VoIP (or iiTalkpack), you will need an additional phone handset and a VoIP compatible modem.

fair contract guarantee

When you sign up for the optional 24 month contract, you commit to retain your broadband service for this set period. However, our fair contract guarantee allows you to change between plans at any time without constituting a break of contract. Full details available online.
