bundling with broadband is better!

When you bundle a Phone 1 plan with our broadband service, you we'll give you bonus download quota on your broadband plan. iiNet broadband plans also come with 10 free email addresses, 30MB of webspace, extended off peak period (2am - 12pm), access to the iiNet freezone and flat-rate monthly fees with no extra charges.

what is iiNet VoIP?

VoIP stands for Voice over Internet Protocol. It allows you to save money by making calls over your broadband service. And if you make a VoIP call to another person on the iiNet VoIP network, your call will be totally free!

To take advantage of iiNet VoIP, simply choose a broadband plan, select any additional hardware you need, then sign up online at www.iinet.net.au or contact us on 13 24 49.

VoIP hardware

There are two types of hardware that can be used to establish a VoIP connection - a VoIP adapter (called an ATA), and a VoIP

enabled modem/router. A VoIP adapter is useful if you currently have a broadband modem/router that isn't "VoIP ready"; the adapter allows you to plug in any touchtone telephone for use with your VoIP service. A VoIP enabled modem/router is the all-in-one solution - just plug in a phone and start calling.

switching to Phone1 is easy

Seamless changeover, no administration fee and we even notify your current provider. No catches - just great rates, and no compulsory contracts. If you bundle with our broadband service, you can also track your calls online and enjoy the convenience of a single invoice for your phone and Internet service.

* Variable rates are charged up until the cap is reached, the flat fee applies for the rest of the call duration up until the specified time limit (e.g. 2 hours for national calls).

The cap includes the 35c flagfall. If the time limit is passed the variable rates apply per minute thereafter.\

For example a national call of:

- 5 minutes costs: $\$0.35 + (5 \times 0.17) = \1.20
- 30 minutes costs: \$1.98
- 90 minutes costs: \$1.98
- 2 hours and 15 minutes costs: $\$1.98 + (15 \times 0.17) = \4.53

Prices are valid as of 24 April 2008 and are subject to change.
